Minecraft Setup Instructions
Java Edition on Chromebook

We are excited about your child's participation in the upcoming Minecraft Event! If your child plans to use a Chromebook device, completing this setup is required to participate. We have provided the detailed setup process for using devices to play Minecraft, with screenshots and tips for connecting to the Minecraft Server.

Enable the Linux Environment **2**
Install Minecraft Java Edition **2**
Launch Minecraft Java Edition **4**
Sign In to Setup the Game **5**
Sign In With Your Own Microsoft Account 5
Sign In With a TD3IG Provided Microsoft Account 8
Join Our Server **9**
Conclusion **10**

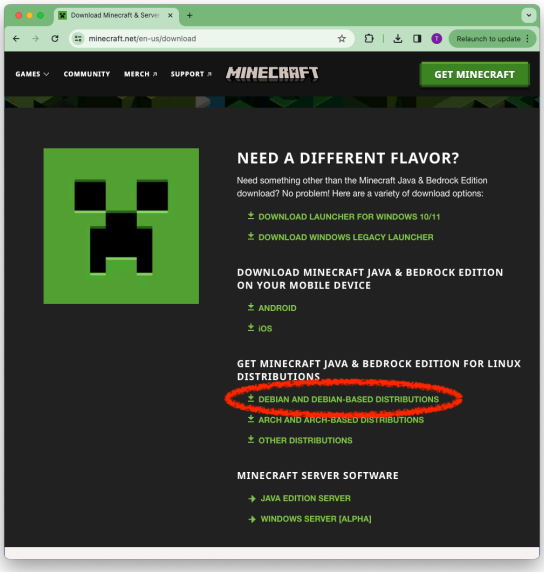

Enable the Linux Environment

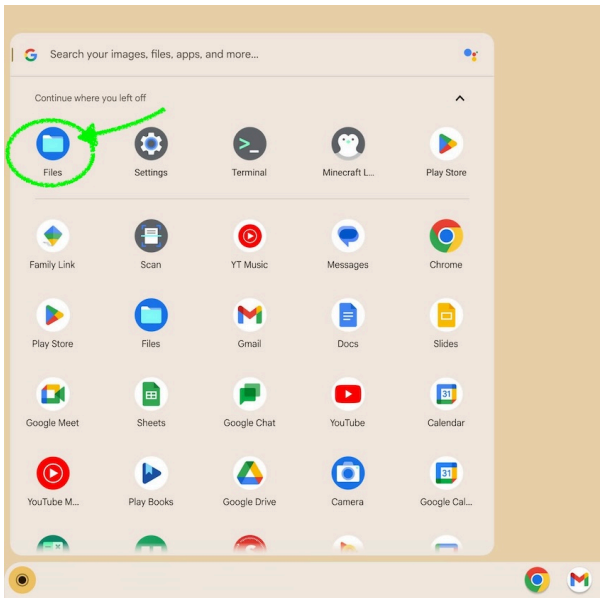

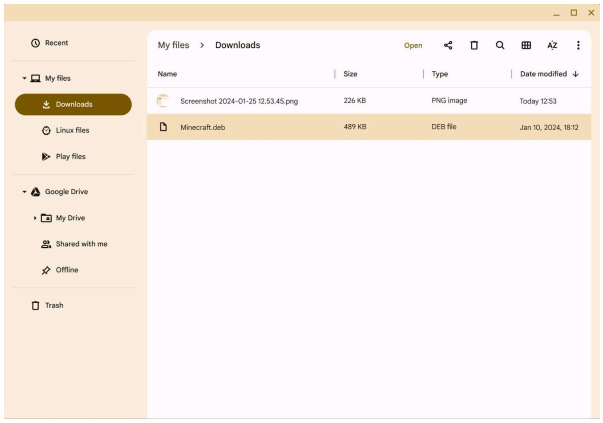

Full Instructions here https://support.google.com/chromebook/answer/9145439.

*Note that if this is an organization owned Chromebook instead of a personal device, your Google Organization Administrator may have disabled the ability to enable Linux. You will need to work with them to enable it in order to run Minecraft Java Edition. Note that most Chromebooks also support Bedrock Edition, which can be directly installed from the **App Store**, Bedrock Edition must be purchased, while Java Edition is a free install.*

Install Minecraft Java Edition

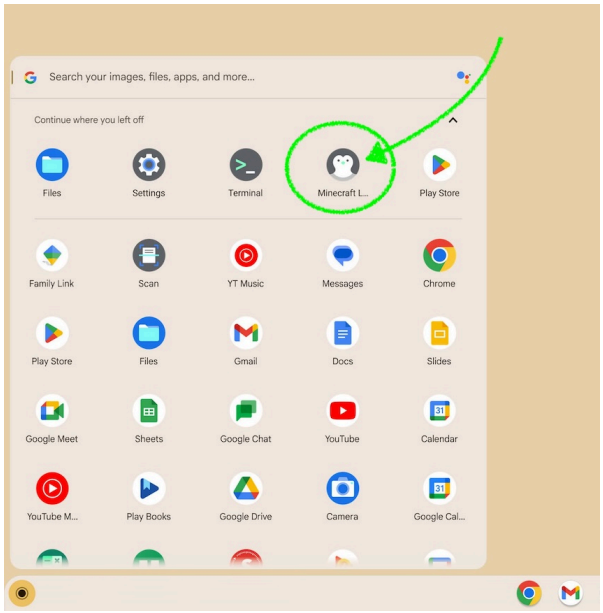

If you do not already have **Minecraft Java Edition** installed, follow these instructions

1. Download **Minecraft Java Edition** from minecraft.net/download. This is a free download. Scroll down to download the **Linux Debian** version by clicking the **DEBIAN AND DEBIAN-BASED DISTRIBUTIONS** link	

2. Open the **Files** application and browse to the **Downloads** folder • Open the Start Menu *(click the circle icon on your shelf)* • Click on the **Files** application	
3. Install Minecraft • **Double-click** on the **Minecraft.deb** file you just downloaded Congrats! Minecraft is installed!

Launch Minecraft Java Edition

1. Open the Minecraft Launcher • Open the **Start Menu** (click the circle icon on your shelf) • Click on the **Minecraft Launcher** Congrats! The Minecraft Launcher will start!	

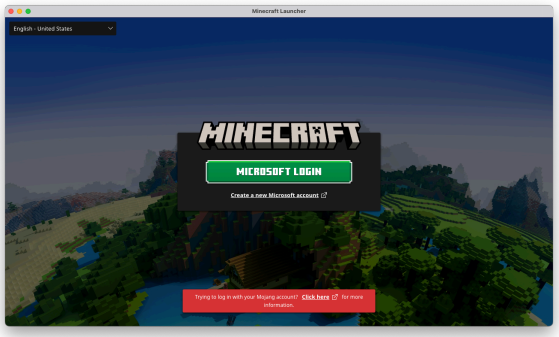

Sign In to Setup the Game

You will need to use an Xbox Live account that has already purchased **Minecraft Java Edition**. If you have purchased it already, go ahead and sign in as that user, and provide your Gamertag to the host. Otherwise you may go ahead and purchase it, or ask the host to use one of our accounts.

Sign In With Your Own Microsoft Account

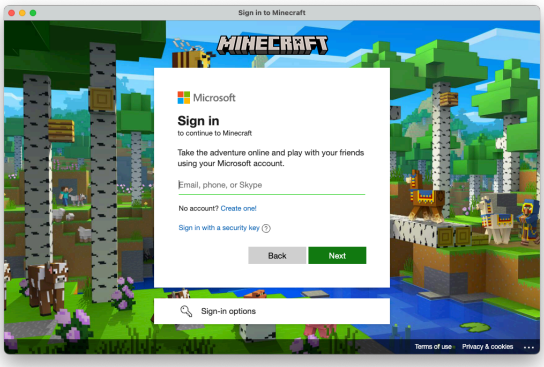

1. Open the **Minecraft Launcher** & click the **MICROSOFT LOGIN** button.

To find the launcher, Open the Start Menu (circle icon in bottom-left of the taskbar), Click "Linux Apps", Click “Minecraft Launcher" (the icon is a penguin)

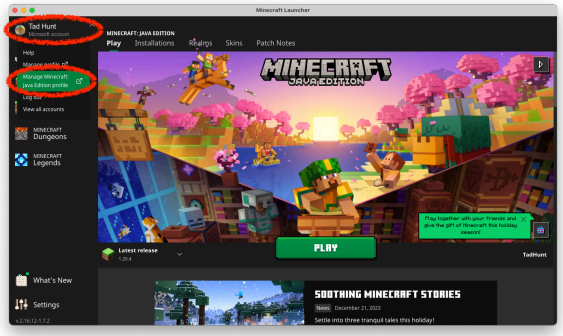

2. Sign in with your Microsoft / Xbox Live account. If you did not purchase **Minecraft Java Edition**, you can either purchase it now, or ask the host to use one of ours.

If you’re using an account provided by the host, skip to the Sign In With a TD3IG Provided Microsoft Account section, otherwise continue with the next step.

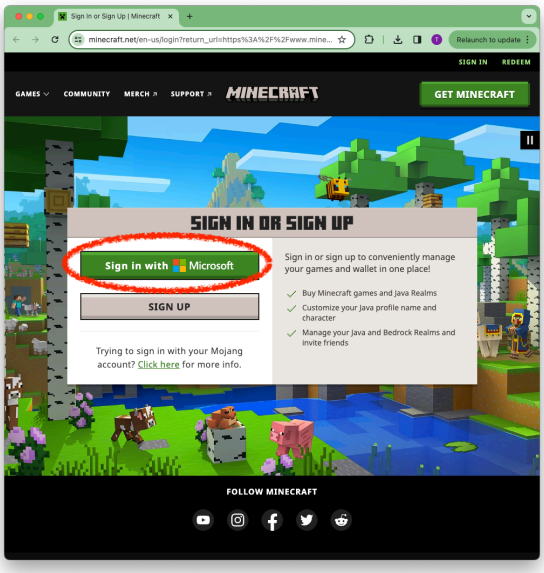

3. You will need to provide your **Java Edition Profile Name** to the host so they can allow you to play on our server.

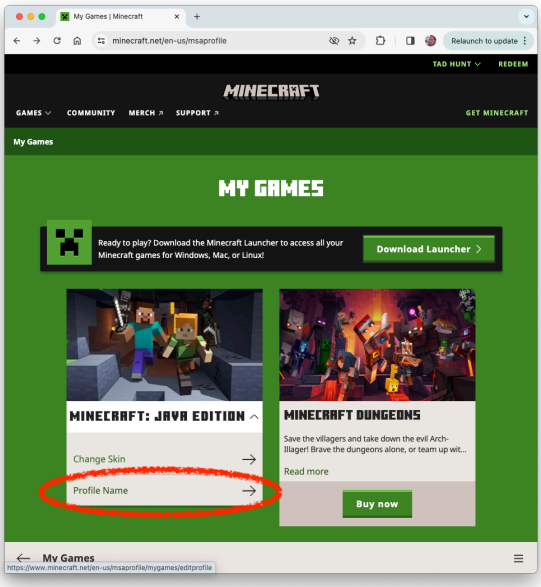

- Click on your account name in the top left of the Minecraft Launcher.
- Click **Manage Minecraft Java Edition Profile Name**.
- A browser will open to minecraft.net/login.
- Continue with Step 4.

4. In the browser tab, sign in with the same Microsoft account that you're signed into the Minecraft Launcher with.

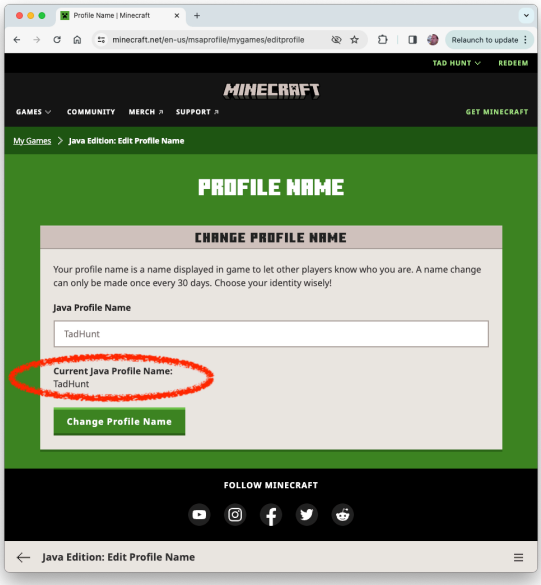

5. Find your **Java Profile Name**
   - Scroll down and find **MINECRAFT: JAVA EDITION**.
   - Click **Profile Name →**

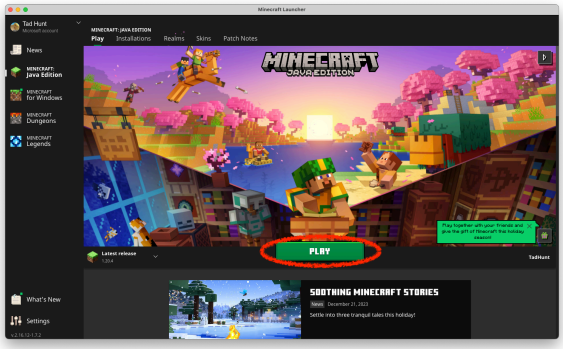

6. Give the **Current Java Profile Name** to the host. Make sure you share it exactly, including capitalization, numbers, and punctuation.

Close your browser and go back to the **Minecraft Launcher**.

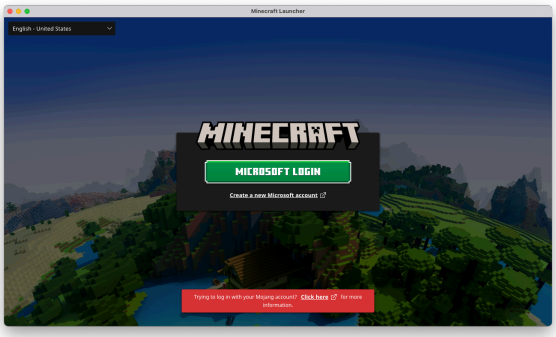

7. Congratulations, you're ready to play!
    - Click the **PLAY** button now

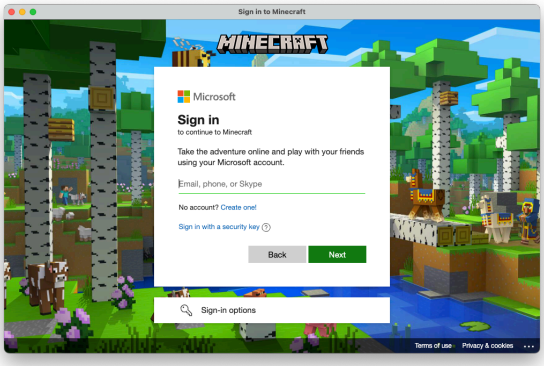

Sign In With a TD3IG Provided Microsoft Account

1. Open the **Minecraft Launcher**
    - Click **MICROSOFT LOGIN**.

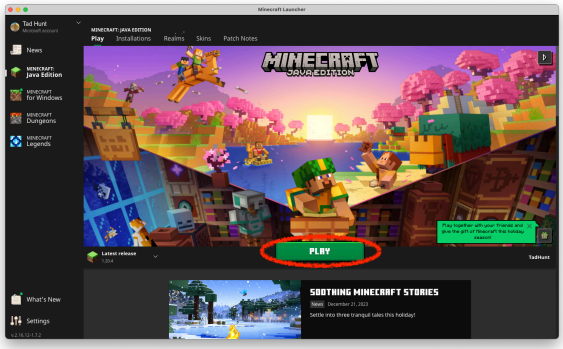

To find the launcher, Open the Start Menu (circle icon in bottom-left of the taskbar), Click "Linux Apps", Click "Minecraft Launcher" (the icon is a penguin)

2. Sign in with the Microsoft / Xbox Live account following the instructions provided by the host.

3. Congratulations, you're ready to play!
   - Click the **PLAY** button now

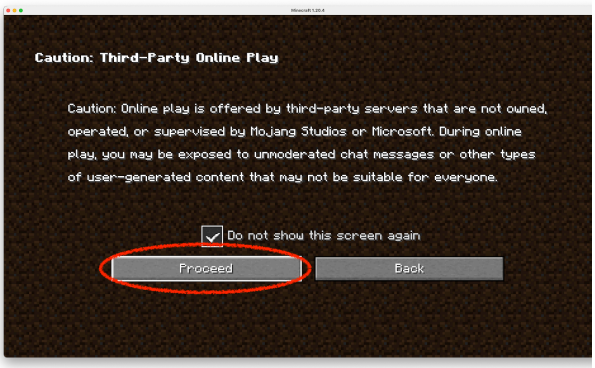

Join Our Server

1. Click **Multiplayer**

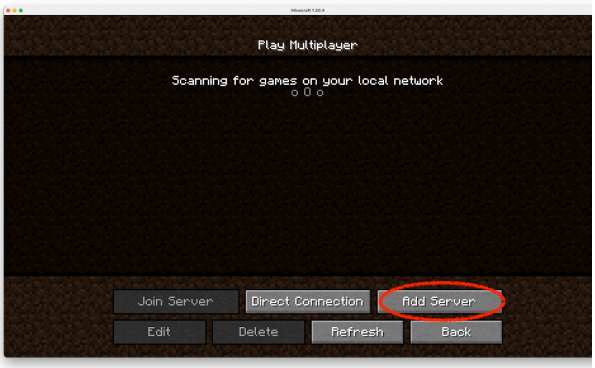

2. If this is your first time playing, you may need to enable **Third-Party Online Play**.

   - Select the **Do not show this screen again** checkbox
   - Click **Proceed**

3. Click **Add Server**

4. Enter the following information:
   Server Name: TD3
   Server Address: 35.245.190.234:10020
   Then click **Done**

5. Select the TD3 Server & click **Join**

Congrats, you're ready to play!

Please ask the host for help if you're having trouble!

Conclusion

You should have successfully set up Minecraft on your devices by following these steps. We're thrilled to welcome them for some super fun gaming experiences! Feel free to reach out to support@mcplaydates.com if you have any further questions or need assistance.
