Minecraft Setup Instructions

Windows, Mac, Linux, Android, iOS, Chromebook

We are excited you are participating in our upcoming Minecraft Program! All devices used for this program must be set up with Minecraft installed prior to the program. Completing the setup is required. Please read on for detailed setup instructions. If you require assistance, contact us at support@arrayscape.com. Thank you for making sure everything is ready—it's going to be a fantastic experience!

Install Minecraft **2**
- Windows, Mac, and Linux 2

Troubleshooting **12**
- How Do I Find My Gamertag? 12
  - Windows, Mac and Linux 12
  - Android, Chromebook, and Apple/iOS devices 12

Conclusion **12**

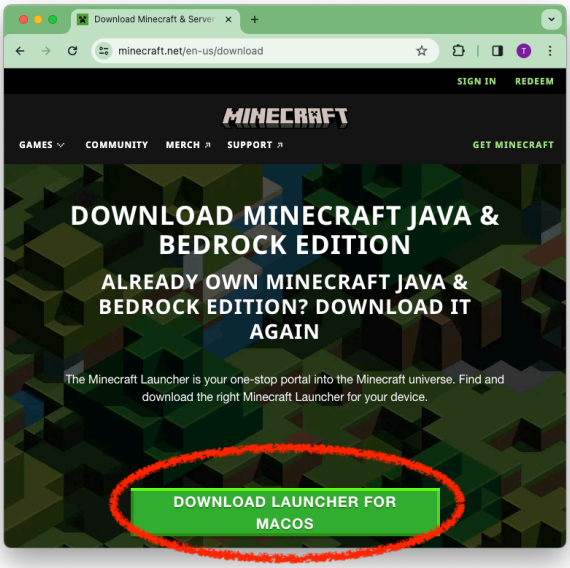

Install Minecraft

If you do not already have Minecraft installed, follow these instructions

Windows, Mac, and Linux

Download **Minecraft Java Edition** from minecraft.net/download and install it. This is a free download. If you haven't already purchased a Minecraft account, you can use one of ours. Just let the host know.

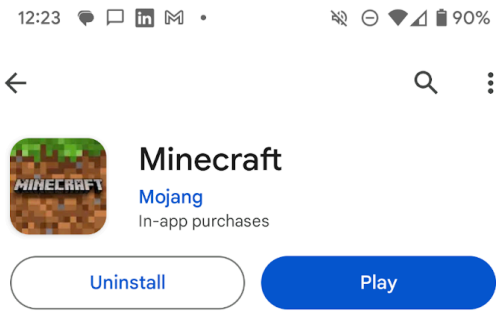

***Windows**: The main download button installs Minecraft from the Windows Store. If the Windows Store doesn't work for you, scroll down on the page and download and run the **WINDOWS LEGACY LAUNCHER** instead.*

Android and Chromebooks

You must purchase and install Minecraft from the Play Store. Be sure you install the one that looks like the picture to the right and is published by **Mojang**.

- Open the **Play Store** app on your device
- Search for Minecraft
- Click **Install**

Apple / iOS Devices

You must purchase and install Minecraft from the App Store. Be sure you install the one that looks like the picture to the right.

- Open the **App Store** on your device
- Search for Minecraft
- Click **Install**

Sign In your Minecraft app to play online

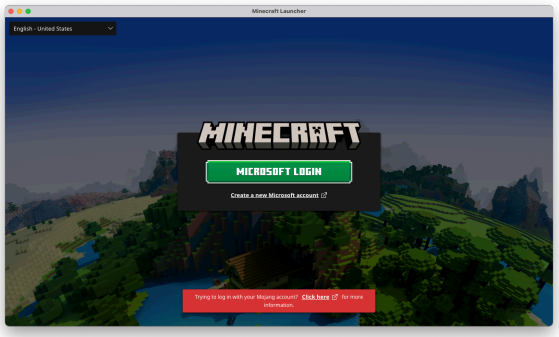

To play locally, you do not need to sign in with a Xbox live account, however, to play online on our server you will need to. If you already have an Xbox live account, make sure you're signed in as that user already and give the host your Gamertag so they can invite you to our server. If you don't have a gamertag already, ask the host and they will give you one of ours to use for the duration of the event.

Windows, Mac and Linux

You will need to use an Xbox Live account that has already purchased **Minecraft Java Edition**. If you have purchased it already, go ahead and sign in as that user, and provide your Gamertag to the host. Otherwise you may go ahead and purchase it, or ask the host to use one of our accounts.

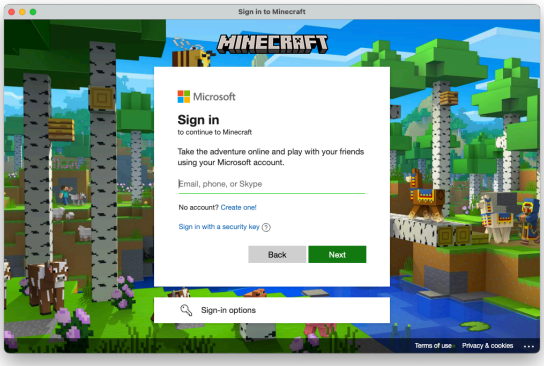

Sign In With Your Own Microsoft Account

1. Open the **Minecraft Launcher** & click the **MICROSOFT LOGIN** button.

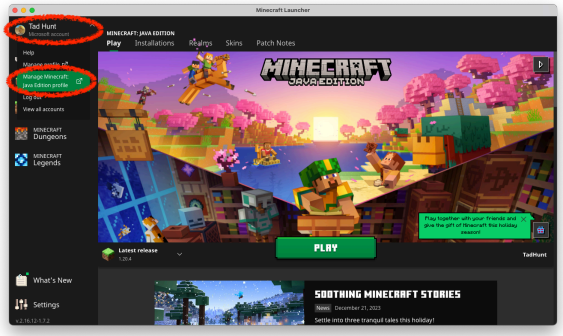

2. Sign in with your Microsoft / Xbox Live account. If you did not purchase **Minecraft Java Edition**, you can either purchase it now, or ask the host to use one of ours.

If you're using an account provided by the host, skip to the Sign In With a Arrayscape Provided Microsoft Account section, otherwise continue with the next step.

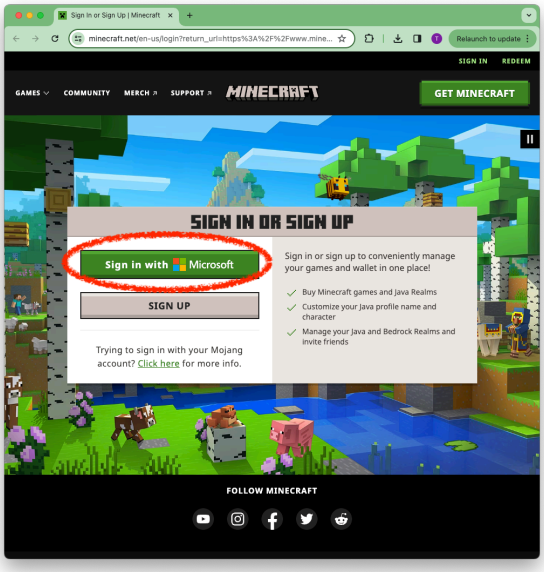

3. You will need to provide your **Java Edition Profile Name** to the host so they can allow you to play on our server.

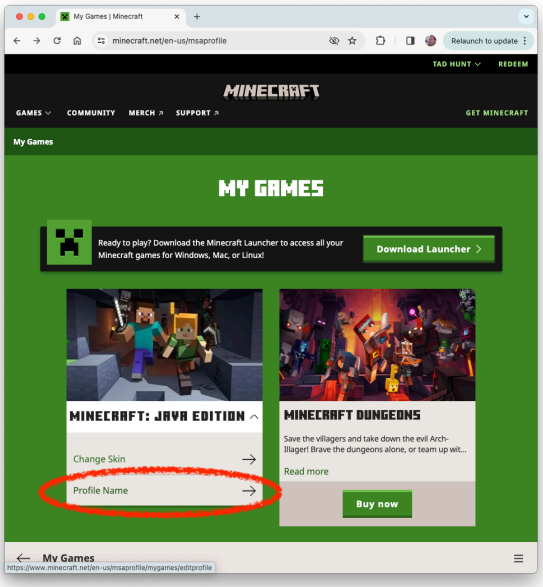

- Click on your account name in the top left of the Minecraft Launcher.
- Click **Manage Minecraft Java Edition Profile Name**.
- A browser will open to minecraft.net/login.
- Continue with Step 4.

4. In the browser tab, sign in with the same Microsoft account that you're signed into the Minecraft Launcher with.

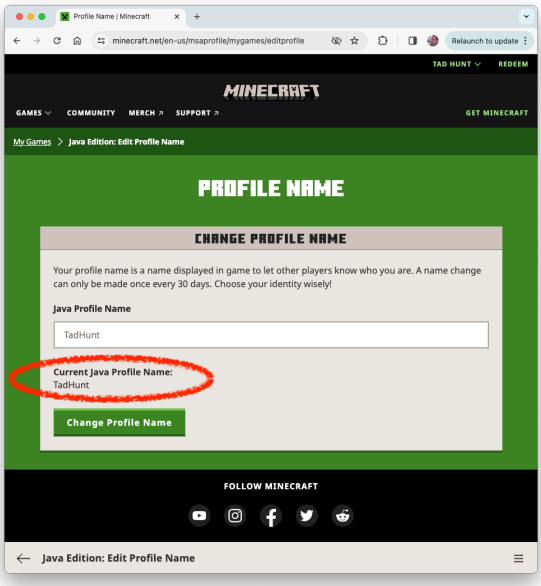

5. Find your **Java Profile Name**
   - Scroll down and find **MINECRAFT: JAVA EDITION**.
   - Click **Profile Name →**

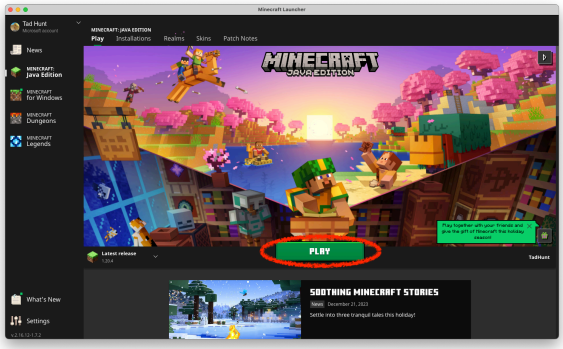

6. Give the **Current Java Profile Name** to the host. Make sure you share it exactly, including capitalization, numbers, and punctuation.

Close your browser and go back to the **Minecraft Launcher**.

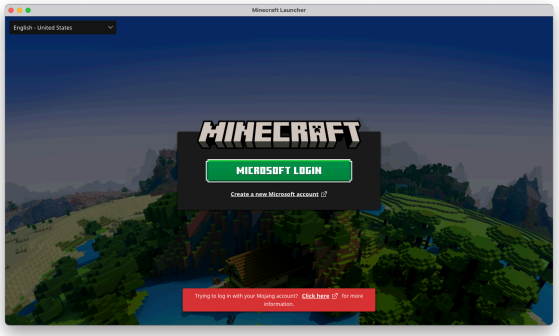

7. Congratulations, you're ready to play!
   - Click the **PLAY** button now

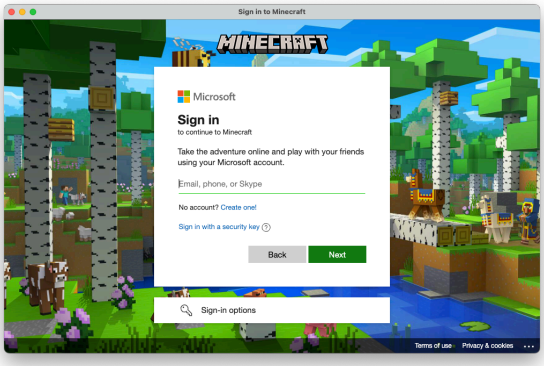

Sign In With an Arrayscape Provided Microsoft Account

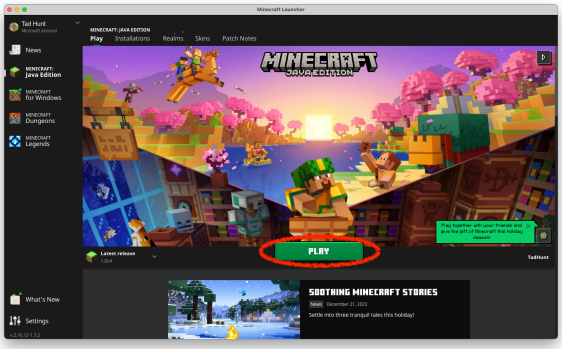

1. Open the **Minecraft Launcher**
   - Click **MICROSOFT LOGIN**.

2. Sign in with the Microsoft / Xbox Live account following the instructions provided by the host.

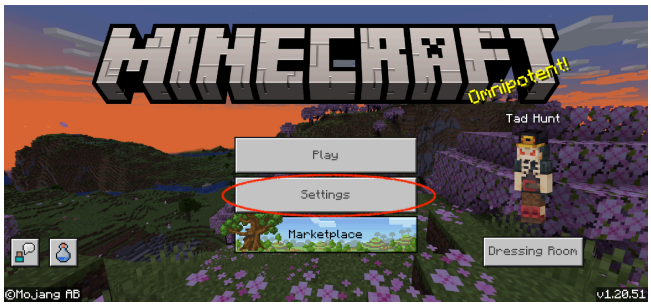

3. Congratulations, you're ready to play!
   - Click the **PLAY** button now

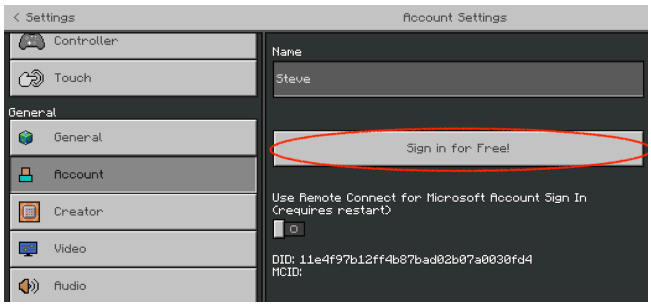

Android, Chromebook, and Apple/iOS devices

1. Open the **Minecraft** App & click **Settings**

2. Click **Sign in for Free** and sign in with your Xbox live account. If you don't have an account already, you can either create one or ask the host to use one of ours.

3. After signing in, go back to the main screen

Join Our Server

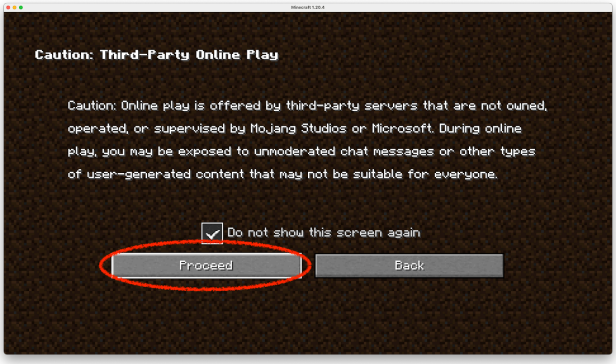

Windows, Mac and Linux

1. Click **Multiplayer**

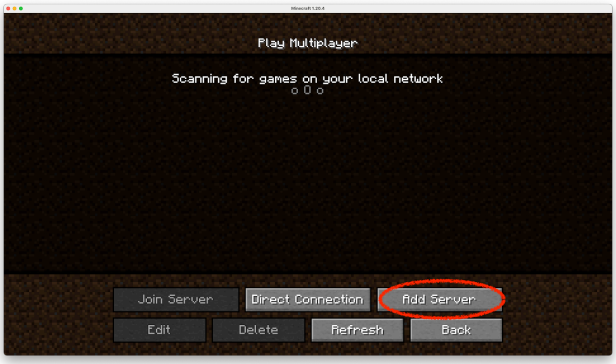

2. If this is your first time playing, you may need to enable **Third-Party Online Play**.

- Select the **Do not show this screen again** checkbox
- Click **Proceed**

3. Click **Add Server**

4. Enter the following information:
   - **Server Name: ASG**
   - **Server Address: 35.245.190.234:10020**

   Then click **Done**

5. Select the ASG Server & click **Join**

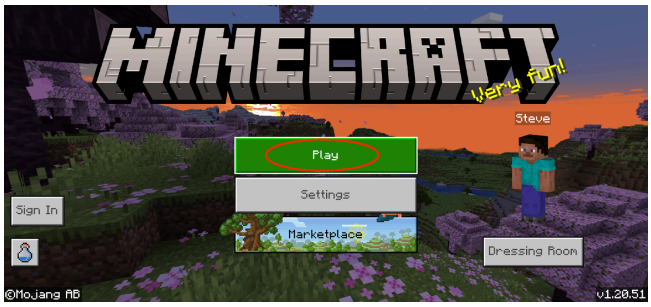

Congrats, you're ready to play!

Please ask the host for help if you're having trouble!

Android, Chromebook, and Apple/iOS devices

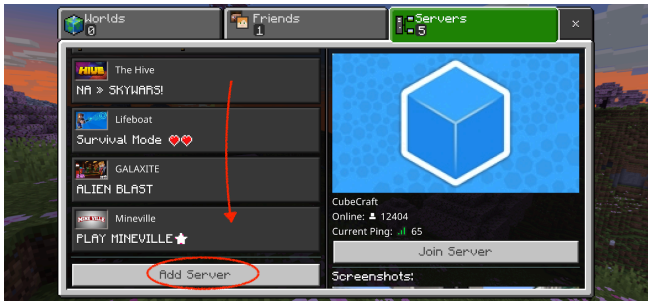

1. Launch **Minecraft** & click **Play**

2. Click **Servers**

3. Scroll to the bottom of the server list.
   Then click **Add Server**

4. Enter the following information:
   - Server Name: **ASG**
   - Server Address: **35.245.190.234**
   - Port: **10021**

   Then click **Save**

5. Select the ASG Server & click **Join**

Congrats, you're ready to play!

Please ask the host for help if you're having trouble!

Troubleshooting

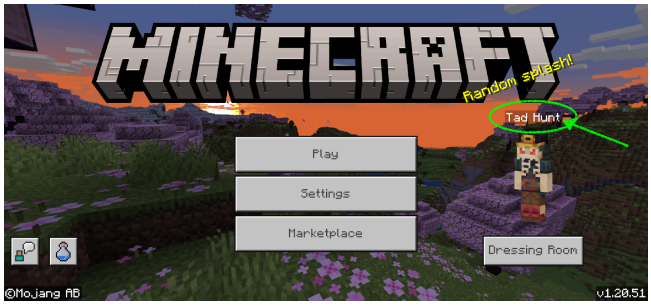

How Do I Find My Gamertag?

Windows, Mac and Linux

Follow the instructions in the Sign In With Your Own Microsoft Account section above.

Android, Chromebook, and Apple/iOS devices

Your Gamertag will show up over your character's avatar on the game's main screen. In this screenshot the player's Gamertag is **Tad Hunt**. Note that your Minecraft app must be signed into your Microsoft account in order to join a server. See the Sign In your Minecraft app to play online section for help.

Conclusion

You should have successfully set up Minecraft on your devices by following these steps. We're thrilled to welcome them for some super fun gaming experiences! Feel free to reach out to

support@arrayscape.com if you have any further questions or need assistance.

Let the Minecraft adventures begin!
